

# CEBoK™

The most comprehensive cost resource and training program available to the cost estimating professional!

## COST ESTIMATING BODY OF KNOWLEDGE

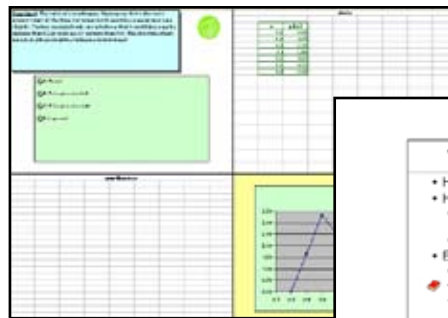

### New and improved content!

The Cost Estimating Body of Knowledge is SCEA's official training course material, conveniently available in CD-ROM. CEBoK expands on the foundation set by its predecessor product, CostPROF, offering enhanced content and new topics such as Operations and Support (O&S) estimating; schedule estimating and risk; non-OLS regression techniques; Monte Carlo simulation; cost accounting rate structures; depreciation; and many more. Each module includes student exercises to test your knowledge, a glossary of terms, and a bibliography of resources for further study. This program teaches and quizzes an individual on the most pertinent cost topics that support thorough cost analysis.

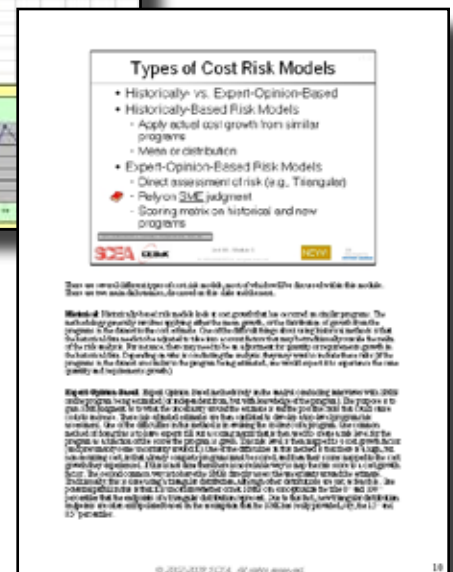

### Interactive, computer-based modules. . .

Information is organized within 16 modules divided into 5 units: Cost Estimating; Cost Analysis Techniques; Analytical Meth- Management Applications. Management Applications. sentation with notes and presentation includes links to as well as terms found in tions. CEBoK is designed study by an individual or environment. While the studied from start to fin- also be studied as a stand-alone lesson. This format is designed to afford the most flexibility to both the student and instructor.

Whether you're looking to prepare for the CCEA exam, looking to brush up on old skills, or to learn new skills and information, CEBoK is the right product for you!
